

OUTREACH - Museum on Wheels

Special Offer: Any Outreach scheduled to occur before March 5, 2012 will receive a \$25 discount per booking. Discount must be requested at time of booking.

See page 21 for rates.

How can you add excitement to a science lesson?

Let us bring an educational outreach program to your school. Sign up for your adventure today!

Assembly Outreach - Our assembly programs are 45 minutes of exciting education. All you need to provide is a room or auditorium large enough to accommodate up to 120 people. We'll bring the rest.

Classroom Outreach - We bring hands-on activities into your classroom. Sessions last 45 minutes and can accommodate up to 30 students per session.

PLEASE NOTE: Due to set up/break down time it is EXTREMELY USEFUL to designate one area for the Museum classroom presentations and have the students rotate through during the day.

Cold Blooded Critters

Assembly or classroom. Adapted to grade level.
What characteristics do reptiles share? How many kinds of reptiles are there? Meeting our reptiles will encourage your students to learn about these fascinating animals and their place in our ecosystems.

All Bugged Out!

Classroom only. Adapted to grade level.
Let us bug your classroom and show you and your students the wonderful world of arthropods. Enjoy a close encounter with our creepy, crawly creatures.

Crazy Chemistry!

Assembly or classroom. Adapted to grade level.
Amaze your students as energy and matter come to life in this exciting chemistry demonstration. You've never seen your kids so blown away by these super cool chemical and physical changes.

CSI: Chemistry

Classroom only. Grades 4-8.

Students become science sleuths utilizing their own brain-power to solve the puzzle of the mystery box! Find out how scientists use the scientific method to solve real world problems, learn how to create a hypothesis, collect data, and conduct scientific inquiries.

Eco Twister

Classroom only. Adapted to grade level.

Students take part in our Eco survival game to understand how living things are interconnected with their environment and how drastic changes affect the future survival of Earth's species. Meet a Museum animal ambassador who is an expert on survival!

Constellation Celebration

Classroom only. Grades 2-8.

Take a journey through the night sky in our portable planetarium. Learn about the distances between heavenly bodies, star brightness and how to use star constellations as a guide just like ancient explorers did.

PLEASE NOTE: *Our Star Lab's dome requires facilities to have high ceilings (12 feet or taller). Please make sure you have the proper space before booking.*

Planet Watch

Classroom only. Grades 4-8.

The future is way off but you can learn how to protect the planet today! Learn about global warming, how the green house effect works, and ways to keep it cool by going green.

CAFETERIA of Discovery and Science

NEW SCIENCE NIGHT Outreach Program!

Bringing parents, teachers and students together with science is easy! This new program offers 20 hands-on experiments and demos that add up to learning fun! Each science station comes with all the materials and training instructions for an adult volunteer. A Museum presenter will be on hand to answer questions and ensure a GREAT experience!

Program Times

5:30 p.m.: Museum presenter arrives for set up

6:00 p.m.: Volunteers arrive

6:30 - 8:00 p.m.: Student Experience
(Schedule can be adapted to meet needs.)

Schools supply a large room (Cafeteria), 20 tables, and 20 volunteers. The Museum brings the rest!

Cost of program: \$300
